The spread of education in society is at the foundation of success in countries that are latecomers to development. In the quest for development, primary education is absolutely essential because it creates the base. But higher education is just as important, for it provides the cutting edge. And universities are the life-blood of higher education. Islands of excellence in professional education, such as Indian Institutes of Technology (IITs) and Indian Institutes of Management (IIMs) are valuable complements but cannot be substitutes for universities which provide educational opportunities for people at large.

There can be no doubt that higher education has made a significant contribution to economic development, social progress and political democracy in independent India. It is a source of dynamism for the economy. It has created social opportunities for people. It has fostered the vibrant democracy in our polity. it has provided a beginning for the creation of a knowledge society. But it would be mistake to focus on its strengths alone. It has weaknesses that are a cause for serious concern.

There is, in fact, a quiet crisis in higher education in India that runs deep. It is not yet discernible simply because there are pockets of excellence, an enormous reservoir of talented young people and an intense competition in the admissions process. And, in some important spheres, we continue to reap the benefits of what was sown in higher education 50 years ago by the founding fathers of the Republic. The reality is that we have miles to go. the proportion of our population, in the age group 18-24 that enters the world of higher education is around 7 per cent, which is only one-half the average for Asia. The opportunities for higher education, in terms of the number of places in universities, are simply not enough in relation to our need. What is more, the quality of higher education in most of our universities requires substantial improvement.

It is clear that the system of higher education in India faces serious challenges. It needs a systematic overhaul, so that we can educate much larger numbers without diluting academic standards. This is imperative

because the transformation of economy and society in the 21st century would depend, in significant part on the spread and the quality of education among our people particularly in the sphere of higher education. It is only an inclusive society that can provide the foundations for a knowledge society.

The challenges that confront higher education in India are clear. It needs a massive expansion of opportunities for higher education, to 1500 universities nationwide, that would enable India to attain a gross enrolment ratio of at least 15 percent by 2015. It is just as important to raise the average quality of higher education in every sphere. At the same time, it is essential to create institutions that are exemplars of excellence at par with the best in the world. In the pursuit of these objectives, providing people with access to higher education in a socially inclusive manner is imperative. The realisation of these objectives, combined with access, would not only develop the skills and capabilities we need for the economy but would also help transform India into a knowledge economy and society.

LEGAL APTITUDE

Directions:. Each question consists of legal propositions/ principles (hereinafter referred to as 'principle') and facts. These principles have to be applied to the given facts to arrive at the most reasonable conclusion. Such principles may or may not be true in the real sense, yet you have to conclusively assume them to be true for the purposes of this section. In other words, in answering the following questions, you must not rely on any principles except the principles that are given herein below for every question. Further, you must not assume any facts other than those stated in the question. The

objective of this section is to test your interest towards study of law, research aptitude and problem solving ability even if the 'most reasonable conclusion' arrived at may be unacceptable for any other reason. It is not the object of this section to test your knowledge of law.

151. PRINCIPLE: When one person signifies to another his willingness to do or to abstain from doing anything, with a view to obtaining the assent of that other to such act or abstinence, he is said to make a proposal. The expression of willingness/desire results in a valid proposal only when it is made/addressed to some person(s).

152. PRINCIPLE: A proposal (offer) should be made with an intention that after its valid acceptance, a legally binding promise or agreement will be created. The test for the determination of such intention is not subjective, rather it is objective. The intention of the parties is to be ascertained from the terms of the agreement and the surrounding circumstances under which such an agreement is entered into. As a general rule, in the case of arrangements regulating social relations, it follows as a matter of course that the parties do not intend legal consequences to follow. On the contrary, as a general rule, in the case of arrangements regulating business affairs, it follows as a matter of course that the parties intend legal consequences to follow. However, the above rules are just presumptive in nature, and hence, can be rebutted.

Once the offer is withdrawn or is lapsed, it is not open to be accepted so as to give rise to a contract. Similarly, if a time is prescribed within which the offer is to be accepted, then, the offer must be accepted within the prescribed time. And, if no time is prescribed, then, the acceptance must be made within a reasonable time. 'What is a reasonable time', is a question of fact which is to be determined by taking into account all the relevant facts and surrounding circumstances.
